01 Brief Summary of the Rating Action

The assigned rating reflects Northwind Renewables Limited's (NRL) contracted revenue base, with around 82% of its 410 MW operational capacity tied to long-term power purchase agreements, and its improving scale of operations. The rating is supported by the experience of the promoters in developing and operating wind and solar assets. The rating is constrained by moderate counterparty credit quality of state distribution utilities and exposure to generation variability.

02 Analytical Approach

ACER has considered the standalone credit profile of NRL to arrive at the rating.

03 Key Rating Drivers

CREDIT STRENGTHS

Contracted revenue visibility

Around 82% of operational capacity is contracted under 25-year power purchase agreements at fixed tariffs, providing visibility on revenue over the medium term.

Improving scale and steady margins

Revenue rose to INR 312.40 crore in FY26 from INR 248.10 crore in FY25, while the EBITDA margin remained in the 72-75% range, in line with operating renewable assets.

CREDIT WEAKNESSES

Counterparty concentration

State distribution utilities account for the majority of receivables. Receivable days were around 118 in FY26, and timely realisation remains a key monitorable.

Generation variability

Plant load factors are exposed to wind and solar resource variability, which can affect annual cash flows.

04 Liquidity Indicator: Adequate

Liquidity is adequate, supported by a debt service reserve equivalent to two quarters of debt servicing and free cash of around INR 38.50 crore as on March 31, 2026.

05 Rating Sensitivities

POSITIVE SENSITIVITIES

- Sustained improvement in receivable days below 90
- Commissioning of under-construction capacity within budget

NEGATIVE SENSITIVITIES

- Net leverage above 5.0x on a sustained basis
- Material delay in realisation from counterparties

06 About the Company

Northwind Renewables Limited is a fictional independent power producer used to demonstrate this note generator. It operates 410 MW of wind and solar capacity across three states.

07 Key Financial Indicators (Standalone)

EXHIBIT 2 **Key financial indicators**

Particulars	FY24	FY25	FY26
Revenue (INR crore)	201.30	248.10	312.40
EBITDA (INR crore)	146.90	183.60	229.30
EBITDA margin (%)	72.98%	74.00%	73.40%
Interest coverage ratio (x)	1.92	2.11	2.36
Net leverage (x)	5.10	4.62	4.18
